

Unique Features of SOTECH's Tru-Thrust Units
(for drilling, milling, and tapping)

- High speed units for up to 12,000 RPM
- New units with five (5) year - 10,000 hour warranty
- Spindles and feed quill fully hardened and ground
- Absolute concentric feed force and hydro-check for maximum efficiency
- All controls in rear of the unit for easy access with covers for safety and protection from chips. No "pinch points".
- Pneumatic, hydraulic, or ballscrew feed
- Quick change leadscrew assemblies run in oil bath
- Torque sensing system for tap and leadscrew protection with limit switch
- Leadscrew tapping units with rapid approach and 2 second cycle time
- Bushing type mounting or flange mount
- High torque, compact drives with gear reduced motor for low RPM
